ING Global Index Portfolio Aggressive a Sub-Fund of ING Aria

Class: A LU1903451737

This SICAV is managed by ING Solutions Investment Management S.A.

Objectives and investment policy

The objective of the Sub-Fund is to seek exposure to a broad range of asset classes, such as equities and equity-related securities of all sectors, bonds and money market instruments, as well as cash and cash equivalents.

Exposure to these asset classes will be achieved exclusively through investments in open-ended UCITS (Undertakings for Collective Investment in Transferable Securities) / UCIs (Undertakings for Collective Investment), which are primarily Exchange Traded Funds (ETFs) and other Index Funds that comply with Art. 41 (1) (e) of the Law of 2010. The Sub-Fund may invest directly in cash and cash equivalents.

The reference asset allocation is of 90% in equities and equity-related securities and 10% in bonds and money market instruments. The actual asset allocation may however diverge from the reference asset allocation depending on expectations regarding the market trends.

The Sub-Fund is not subject to any geographic or sectorial restrictions. The currency exposure of the Sub-Fund is flexibly managed. The investment horizon is long term.

The purpose of the Sub-Fund is limited to passive investment in, and administration of, assets on behalf of investors, i.e. any active entrepreneurial management of the assets is excluded.

The Sub-Fund foresees principally to invest in UCITS/UCIs domiciled in member states of the European Union.

The indirect exposure (through investments in UCITS/UCIs) to equities and equity-related securities of all sectors may reach up to 100% of the Sub-Fund's net assets.

The indirect exposure (through investments in UCITS/UCIs) to bonds and money market instruments will be mainly to investment grade debt securities and will not exceed 30% of the Sub-Fund's net assets.

At this stage it is not authorized to invest in derivative instruments, except for share-class currency hedging, nor to use efficient portfolio management techniques (as described in Chapter II. B of the prospectus). Should this become the case in the future, the prospectus would be amended accordingly.

The Sub-Fund may invest, only indirectly via open-ended UCITS/UCIs, not more than 20% of its net assets in Asset Backed Securities ("ABS"), Mortgage Backed Securities ("MBS") or Contingent Convertible Bonds ("CoCos").

In the best interest of the investors and subject to appropriate diversification, the Sub-Fund may, for a limited period of time and due to financial market conditions, hold up to 100% of its net assets in cash and cash equivalents, such as deposits, money market instruments and money market funds.

The Net Asset Value ("NAV") is calculated daily as of each Business Day (each a "Valuation Day"). The calculation day is the Business Day following the Valuation Day. The Sub-Fund is denominated in Euro.

Class A shares are available in registered capitalisation and distribution form to retail investors, at the Management Company's (acting as Global Distributor) discretion. This Class A share is not distributing dividends.

Risk and reward profile

This indicator represents the annual historical volatility of the Sub-Fund over a 5-year period.

Due to a lack of sufficient historical data, the risk indicator incorporates simulated data from a benchmark portfolio. Risk Category 5 reflects high potential gains and/or losses for the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Sub-Fund's future risk profile.

The risk category associated with the Sub-Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Sub-Fund not taken into account in this indicator include the following:

Currency risk: The Sub-Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Interest rate risk: An increase in interest rates may cause the value of fixed-income securities held by the Sub-Fund to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

Credit risk: The Sub-Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Sub-Fund's returns because the Sub-Fund may be unable to transact at advantageous times or prices.

Financial, economic and political risks: Financial instruments are impacted by various factors, of which, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation as well as economic and political conditions prevailing in each country.

Charges

The charges and commissions are used to cover the Sub-Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.
