ING Private Banking Optimal Selection Pure Bonds

a Compartment of ING Fund

Class: S (Distribution) LU1236093362

This SICAV is managed by ING Solutions Investment Management S.A.

Objectives and investment policy

The objective of the Compartment is to offer investors worldwide exposure to bond and money markets by investing in fixed-income securities and money market instruments via open-ended undertakings for collective investment ("UCIs") and via open-ended undertakings for collective investment in transferable securities ("UCITS") or via cash or cash equivalents such as deposits with the latter representing a maximum of 1/3 of the assets of the Compartment. The Compartment will not invest directly in Russian or Chinese securities.

The combination of the strategies of the target UCIs/UCITS allows the Compartment to offer a diversified investment vehicle. The investment horizon is long-term.

The Compartment might seek exposure to other asset classes, such as commodities. The exposure to commodities would be gained, only indirectly, via investments in UCIs/UCITS or Exchange Traded Commodities (ETC). No derivative instrument will be embedded in the ETC.

The assets of the Compartment are subject notably to risk relating to investing in units of UCIs/UCITS and to various risks (interest rates evolution, inflation, etc.) as further detailed in the relevant section "Risk Warnings" of the Fund's Prospectus, so that no guarantee can be given on the performance of the Compartment.

Investment restrictions: The Compartment will invest principally via open-ended UCIs/UCITS that have a policy of investing mainly in fixed-income securities and money market instruments.

At this stage it is not intended to invest in derivative instruments. The Compartment will not invest directly in asset backed securities nor in mortgage backed securities.

Your shares will be distributing shares.

Investors may request redemptions of shares daily in line with the relevant section of the Fund's Prospectus.

In the best interest of the investors, the Compartment may, for a limited period of time and due to financial market conditions, hold up to 100% of its net assets in cash and cash equivalents.

Risk and reward profile

With lower risk, With higher risk,
potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Compartment over a 5-year period.

Risk Category 3 reflects limited potential gains and/or losses for the portfolio. This is due to investments in fixed-income securities and money market instruments.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Compartment's future risk profile.

The risk category associated with the Compartment is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Compartment not taken into account in this indicator include the following:

Currency risk: The Compartment invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Interest rate risk: An increase in interest rates may cause the value of fixed-income securities held by the Compartment to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

Credit risk: The Compartment invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Compartment's returns because the Compartment may be unable to transact at advantageous times or prices.

Financial, economic and political risks: Financial instruments are impacted by various factors, of which, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation as well as economic and political conditions prevailing in each country.
